

Household Hazardous Waste HHW

Gasoline, Pesticides, Fertilizers, Fluorescent Light Tubes, Varnish, Oil Based Paint, Mercury

- Contact: Lisa Beursken to Register for the next available HHW Collection by email at LBeursken@eriecounty.oh.gov or by phone at 419-433-7303 x2304

Incandescent Light Bulbs

- Erie County DOES
554 River Road
419-433-7303 x2304

Latex Paint

- Habitat ReStore will recycle old latex, acrylic, or water-base paint for \$2 per can.
7602 Milan Road
419-621-2207
- Dry-out your old latex paint with kitty litter or saw dust and dispose of in your household trash.

Motor Oil

- **Ebert's Garage**
7804 S. Hayes Ave.
419-359-1353
- **Griff's Engine & Machine Co.**
710 Erie St.
419-625-0783
- **Maag's Automotive & Machine Inc.**
Also accepts transmission fluid and cooking oil.
1640 Columbus Ave.
419-626-1539

Pharmaceutical Drugs

Drug Take Back Boxes are available at the following locations:

- Huron Police Station
- Sandusky Police Station
- Vermilion Police Station
- Erie County Sheriff's Office

Plastic Bags

Recycling locations for plastic bags can be found at the following:

- Walmart - Sandusky
- Kroger - Sandusky
- Giant Eagle - Vermilion

Propane Tanks

- **Galloway Brothers**
2717 Old Railroad Rd.
419-626-8492
- **Huron Goodwill**
422 Cleveland Rd.
419-433-7542
- **Sandusky Goodwill**
924 E. Perkins Ave.
419-625-2910

Tires

Please contact the location ahead of time as there may be a recycling fee.

- **Ebert's Garage**
7804 S. Hayes Ave.
419-359-1353
- **Erie County Landfill**
10102 Hoover Rd.
419-433-5023
- **J & J Automotive**
704 W. Washington St.
419-627-8713

Toilets

- **Heitsche Trucking**
2342 Collins Road
Collins, Ohio 44826

What & How 2 Recycle?

PAPER/CARDBOARD RECYCLING

WHAT: Office paper, junk mail, newspaper, cardboard, and magazines are all types of paper that can be recycled.

HOW: Put your paper items in a cardboard box or a paper bag. Depending on your recycling location you may have to sort your paper by type. Please breakdown cardboard.

RECYCLING PROCESS: Once sorted from other materials at a recycling facility, the paper/cardboard is baled. The paper/cardboard bales are sold to paper/cardboard processors. The processors empty the paper/cardboard bales into a large container called a vat (paper & cardboard recycling is the same process). The vat pulverizes the paper/cardboard and mixes the paper/cardboard with the water and chemicals. The “mushy” paper/cardboard is now called paper pulp. The pulp goes through several screens to remove large pieces, and a de-inking stage to remove ink and glue. Finally, the pulp goes through a rolling machine for the paper/cardboard to be flattened, dried, and is wound into giant rolls. The paper/cardboard rolls are sold to manufacturers who make different products with the paper (stationary, office paper, boxes etc.)

PAPER/CARDBOARD PROCESSORS:

- Sandusky Steel, Sandusky
- Allied Waste, Sandusky & Oberlin
- FSI Disposal, Clyde

PAPER/CARDBOARD MANUFACTURERS:

- Grossman Environmental Recycling Inc., Westerville
- Ohio Specialty Paper, Mount Vernon

WHAT BIN?: Please see Where 2 Recycle on the inside of this brochure to determine if your location has multiple bins or just one bin and where the materials should be placed.

METAL RECYCLING

WHAT: Aluminum, steel, and bi-metal cans from food containers and/or beverage containers are accepted. Empty dry paint cans, empty aerosol cans are also accepted for recycling.

HOW: To recycle glass please remove labels and rinse the containers thoroughly if possible.

RECYCLING PROCESS: Your metal cans and containers are separated by type of metal at the recycling facility or scrap metal company, some of which can be done magnetically. Some of the metal requires a thin layer of tin to be removed from the other metal such as steel. Recycling facilities and/or scrap metal companies sell the metal to processing facilities. The processing facilities melt the metal into flat sheets. The processing plant may also be a manufacturing plant in which case they will turn the sheet of metal into products such as cans.

METAL PROCESSORS:

- Sandusky Steel & Supply Co., Sandusky
- Galloway Brothers, Sandusky
- Norwalk Waste Materials, Norwalk

METAL MANUFACTURERS:

- Mach Iron, Sandusky
- Geo Corp, Huron
- Sandusky International, Sandusky

WHAT BIN?: Please see Where 2 Recycle on the inside of this brochure to determine if your location has multiple bins or just one bin and where the materials should be placed.

GLASS RECYCLING

WHAT: Glass jars and bottles from food and beverages are accepted. All types of colors of glass are accepted.

HOW: To recycle glass please remove labels and rinse the containers thoroughly.

RECYCLING PROCESS: Your glass jars and containers are separated by color at the recycling facility. Glass is then sent/sold (depending on quality and markets) to processing plants for further sorting by color and size. Processors then sell the glass to manufacturers in the area who recycle the glass into new containers and bottles for food and beverages and/or fiberglass insulation.

GLASS PROCESSORS:

- Strategic Materials, Cleveland
- Rumpke, Dayton
- Dlubak Glass, Upper Sandusky

GLASS MANUFACTURERS:

- Owens-Illinois, Perrysburg (*World Headquarters*)
- Owens-Illinois, Zanesville
- Owens Corning,

WHAT BIN?: Please see Where 2 Recycle on the inside of this brochure to determine if your location has multiple bins or just one bin and where the materials should be placed.

Glass is not currently accepted at the Margareta Township Drop-Off Location

What & How 2 Recycle?

PLASTIC RECYCLING

WHAT: Plastics that are coded #1-#7 (see below) are recyclable in Erie County with the exception of Styrofoam (please see Other Recyclables to learn how to recycle this material).

HOW: To recycle plastic please remove labels and rinse the containers thoroughly. **Optional:** remove the cap and try to compress all the air out of the container and screw the cap back on to hold shape. This saves room in your recycling container.

NOT ALL PLASTICS ARE ALIKE: All plastic has a coding number from #1-#7 that can be found on the bottom (usually) of the item located inside a recycling symbol. The code identifies the resin used to make a particular container or bottle. The code allows both the consumers and the recyclers to identify and sort containers. For a better understanding of plastic coding here are the numbers and examples of the products that included under the codes:

- #1 - Polyethylene Terephthalate (PET): water bottles, soda bottles, peanut butter jars.

- #2 - High Density Polyethylene (HDPE): milk jugs, shampoo bottles and detergent bottles.

- #3 - Vinyl/Polyvinyl Chloride (PVC): cooking oil bottles, shampoo bottles, and window cleaning products. **NOT PVC PIPE**

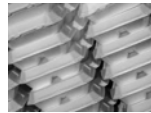

- #4 - Low Density Polyethylene (LDPE): bread bags, plastic shopping bags, and shrink wrap.

PLASTIC RECYCLING CONTINUED

- #5 - Polypropylene (PP): bottle lids, straws, food containers, and aerosol caps.

- #6 - Polystyrene (PS): container packing, packing peanuts, and "to go" items such as cups and plates.

- #7 - All Other Resins and Layered Multi-Material (Other): everything else.

RECYCLING PROCESS: Your plastic is taken to a recycling facility where it is sorted and baled by number. Some plastics are also sorted by color. The plastic bales are then sold to plastic processors which take the material and shred them to a flake. The flake is washed to remove labels, chemicals, and other impurities. Plastic flake that is to be used by the food industry must undergo several washes to be approved by FDA standards. The flake is then melted and extruded to form pellets that are then sold to plastic manufacturers. Plastic manufacturers either use the recycled flake or mix the recycled flake with virgin flake depending upon specs and melt the flake. Once melted, the plastic can be extruded, injection molded, or molded into whatever shape the manufacturer makes and sells.

PLASTIC PROCESSORS:

- Allied Waste, Sandusky & Oberlin
- Evergreen Plastics, Clyde
- FSI Disposal, Clyde
- Phoenix Technologies, Bowling Green

PLASTIC MANUFACTURERS:

- Evergreen Plastics, Clyde
- South Eastern Container, Bowling Green

WHAT BIN?: Please see Where 2 Recycle below to determine if your location has multiple bins or just one bin and where the materials should be placed.

Special Material Recycling

For a complete listing of all the special material recycling locations please go to www.ErieCountyRecycles.org and click on How, What, Where, to Recycle then click on Special Material Recycling.

Curbside Recycling Options

Erie County Residents can call any Erie County Waste Hauler and ask for curbside recycling:

Cyclone Waste Services

419-684-9797

Republic Waste Services

419-626-2454

Ruffin Refuse

419-625-2004

U.S. Rubbish

419-3709074

Where 2 Recycle

Erie County Drop-Off Sites

The following drop-off recycling sites are provided by the Erie County Solid Waste Management District.:

1.

Erie County Landfill

10101 Hoover Road
Milan Township

3.

Central Erie Supply & Elevator

4320 Mason Road, Oxford Township

4.

Groton Township Services Building

9414 Portland Road, Groton Township

**2017 CURBSIDE RECYCLING
PROGRAMS ARE COMING!**

Erie County Recycling Drop-Off Location

- **Red** the recycling location has one recycling container for all materials.
- **Blue** the recycling location has multiple bins: one for cardboard, one for newspaper, and one for mixed in which all other materials are to be placed. Locations with multiple bins have signs for the different materials.

Municipality Drop-Off Sites

Residents of the following Erie County Municipalities can use the following drop-off recycling sites. The Municipalities listed are responsible for the operation and maintenance of these locations:

6.

City of Sandusky (East-Side) Kiwanis Park

2227 First Street, Sandusky
419-627-5844

7.

City of Sandusky (West-Side) Services Complex

Marquette Street, Sandusky
419-627-5844

8.

Margaretta Township

316 East Lucas Street, Margaretta Township
419-684-5686
